TERMS & CONDITIONS OF SALE

Aqua Clear Products Ltd ("ACPL") supplies all goods to you subject to these terms and conditions:

1. Acceptance
 - 1.1 By placing an order with ACPL you accept these terms and conditions as forming part of the contract of sale.
2. Price
 - 2.1 All orders will be filled at prices current at the date of delivery of the goods. Prices are subject to change without notice and are exclusive of GST and freight and insurance costs.
3. Delivery and Insurance
 - 3.1 All goods are despatched uninsured and are at purchaser's risk during transit unless specified.
 - 3.2 Dates given for delivery are stated in good faith but are not to be treated as a condition of sale. ACPL is not responsible or liable in any way for loss suffered due to any delay in delivery.
4. Warranty
 - 4.1 Goods are sold subject to warranties provided by the manufacturer of the goods. ACPL does not provide any warranty itself in relation to the goods and will not be responsible for any direct, indirect or consequential loss arising from faulty goods. ACPL will endeavour to obtain on behalf of its customers replacement or repair of faulty items which are subject to manufacturer's warranty conditions. Freight on these items is at purchaser's cost.
 - 4.2 Where this agreement would otherwise be subject to the Consumers Guarantees Act 1983 ("the Act") and the goods are being acquired for business purposes as defined in the Act the customer agrees that the goods are being acquired for business purposes and the Act does not apply to the supply of goods to the customer.
5. Return of Goods
 - 5.1 ACPL may, at its discretion, arrange for the repair or replacement of any damaged or defective goods or make a reasonable allowance on the purchase of goods to replace the goods provided that
 - (a) The goods are returned within 14 days of delivery at the cost of the customer, together with a copy of the invoice and claim specifically identifying the damage or defects; and
 - (b) ACPL has a reasonable opportunity to investigate the claim.
 - 5.2 In the event that the return of goods is accepted by ACPL a handling charge of 15% of the invoice value will apply.
6. Terms of Payment
 - 6.1 Payment is due in cash at the time an order is placed with ACPL unless ACPL has previously agreed to supply the goods on trade terms.
 - 6.2 Where ACPL is supplying the goods on trade terms, payment is due on the 20th of the month following receipt of the invoice. All payments must be made without any set off or deduction.
 - 6.3 Overdue accounts will be subject to credit restrictions and incur interest at the rate of 2% per month from the due date until payment is received.
 - 6.4 The customer shall be responsible for any and all legal costs incurred for the recovery of any overdue amounts.
7. Ownership
 - 7.1 At all times the legal and beneficial ownership of the goods remains with ACPL (irrespective of delivery of the goods to the customer) until the customer has paid the full invoice price and any other payments due to ACPL in respect of the goods arising out of the sale agreement.
 - 7.2 The customer acknowledges that ACPL has a security interest (as that term is defined in the Personal Property Security Act 1999 ("PPS Act")) in all goods supplied to the customer. ACPL reserves the right to register a financing statement on the Personal Properties Securities Register to prioritise and protect a security interest in the goods. The purchaser agrees to provide ACPL with any or all information referred to in Section 142 of the PPS Act to enable ACPL to ensure that its security interest becomes a "perfected security interest" as defined in the PPS Act.

PUMPS

INSNRG LSV2100 Variable Speed Pump

Description:

The LSV Variable speed pump combines a 4 pole motor with a redesigned impeller to give improved water flow at lower speeds. Speed is adjustable between 600rpm - 2000rpm and delivers 150lpm @ 800rpm

Warranty - 3 Years

	Product Code	Flow Rate @ 8 m/h	Conns "mm"	List Price
INSNRG QI1100	243021	320 lpm	50mm	\$3,105.00

PUMPS

INSNRG QI Variable Speed Pump

Description:

The QI Variable speed pump allows filtration rate to be tailored to the pool with speed adjustable from 600rpm - 2850rpm

The unique design includes an internal weir to provide exceptional priming performance, along with a moulded handle to aid installation.

Available in two sizes to fit all pool types

	Product Code	Flow Rate @ 8 m/h	Conns "mm"	List Price
INSNRG QI1100	243021	320 lpm	50mm	\$3,050.00

CONTROL SYSTEMS

INSNRG InTouch

Description:

InTouch from INSNRG takes a new approach to automation of a pool or spa. The easy to use Intouch portal will connect directly to a wide range of INSNRG pool equipment - allowing simple APP based control direct from a phone or tablet. Systems can be connected by standard CAT5E cables for easy expansion. The InTouch system will control pumps times and speed, optimal sanitiser levels, heating and lighting control.

PAL PCR POOL TOUCH CONTROLLERS

PAL PCR5 Automation

Description:

The new PAL PCR 5 Series wireless control system provides 5 separate channels all operated by touch from the remote control handset or via smart phone. PAL system link allows channel 5 to be used for lighting control of PAL PCR4.

Options: 10amp, 20amp or 35amp

Warranty: 12 month return to base

Product Code	Description	List Price
42-PCR-5CAW	5 Channel Control with WiFi & remote 1 X 10amp supply lead	\$1,505.00
42-PCR-5CAW-20	5 Channel Control with WiFi & remote 2 X 10amp supply lead	\$1,380.00
42-PCR-5CAW-35	5 Channel Control with WiFi & remote 1 x 15amp, 2 X 10amp supply lead	\$1,656.00

PAL PCR9 Automation

Description:

The new PAL PCR 9 Series wireless control system provides 4 controller power channels plus electric valve control and 4 channel lighting control for an all in one automation package. Controlled Via phone with network compatibility.

Options: 10amp, 20amp or 35amp

Warranty: 12 month return to base

Product Code	Description	List Price
42-PCR-9CAW	9 Channel Control with WiFi 1 X 10amp supply lead	\$2,259.00
42-PCR-9CAW-20	9 Channel Control with WiFi 2 X 10amp supply lead	\$2,334.00

CHEMICAL DOSING SYSTEMS

INSNRG RI - Automatic Acid (pH) & Chlorine (OPR)

Description:

The Ri Automatic Doser takes your pool control to the next level. Not only will your pool water be always ready to swim, the Ri comes complete with additional functions which monitor and integrate with other Insnrg pool equipment. The INSNRG RI335 is suitable for all pools up to 250,000L

Warranty:

2 Year Electronic, 1 year probes

Model	Product Code	List Price
INSNRG RI335	133651	\$5,725.00

Inline Chlorine Feeder

Description:

Chlorine and Bromine feeder. Manufactured from clear polycarbonate. Approximate capacity: 3.5 kg of tablets. Lid closing with double safety system. Easy to operate regulation valves. For pools up to 60m3 with Chlorine and up to 30m3 with Bromine. Height: 405mm with 50/40mm connectors

Warranty Guide:

12 Months. - Refer to instructions and website for full warranty details

Model	Product Code	List Price
Rainbow In-Line Chemical Feeder	TF320	\$498.00

INSNRG UV Sanitiser

Description: UV sterilization is the environmentally friendly way to kill 99.9% of all germs and algae present in pool or spa water. The Ui UV system can reduce chlorine demand by as much as 80% - making them ideal for use with VI chlorinators and RI chemical dosers. 2 Pass design ensures maximum exposure to UV light for efficient killing of pathogens and bacteria

Warranty: 12 months power pack - 3000 hours lamp

Model	Product Code	Flow Rate	List Price
Ui UVC 2EX Sanitiser	26307	100-300lpm	\$1,504.00

Zephyr Digital Variable Speed Blower

Description:

The Zephyr Spa Blower uses a AC to DC Switch mode power supply to operate a brushless variable speed motor. This revolutionary design spins at over 100,000 rpm while consuming 65% less energy than a conventional blower

Electronic PWM control enables users to choose a comfortable volume of air while still having the power to purge the blower pipe of water

Warranty: 12 months

Model	Product Code	List Price
Zephyr Variable Speed Blower	24500	\$1,368.00

LIGHTING

Quantum Series

The Quantum WN Series is the ultimate underwater LED swimming pool light. With its superior performance and light distribution coupled with its robust construction and stylish looks. The Quantum is the ideal choice of concrete swimming pools. Also available in "Retro Series" to replace existing WN halogen lights.

OVERVIEW

POWER BUTTON WITH LED INDICATOR

LED indicator remains illuminated while remote is in active state and changes colour to indicate the selected lighting channel.

7 STATIC COLOURS

Choose the colour to suit your mood. With a choice of 7 stunning static colours, you can completely transform the look of your pool at the touch of a button.

POOL / SPA CHANNEL SELECTION

Independently select the colour of your pool and spa lights using the Mode selection button.

Simply select the desired channel (Pool / Spa / Pool & Spa) and choose your favorite colour or show for each.

BRIGHTNESS CONTROL

Now you can select how bright you would like your lights using brightness control.

Select between 3 levels of brightness for the perfect lighting effect for your home.

4 MULTI-COLOUR MODES

Whether it's a romantic night in or a party to remember, the iRIS has a colour show to suit every occasion.

Select between 4 Multi-colour modes from tranquil blues and whites, to fast beat party modes, or simply sit back and enjoy the colours of a beautiful Australian sunset.

With the iRIS lighting controller, the perfect lighting show is always at your fingertips.

ILUKA SEA MINERALS

The Sea & Iluka

ILUKA is an aboriginal word meaning “NEAR THE SEA” and the feeling of being in a sea-like environment is precisely the one we all seek to experience when we relax in our spas or hot tubs.

As well as offering you the pure enjoyment of relaxing in your spa or hot tub, the ILUKA range of spa chemicals is designed to offer you the additional benefits of a rewarding healthy and therapeutic experience.

It contains a combination of tried and trusted health promoting minerals in the form of Magnesium, Potassium and Ocean Trace Elements all of which are created by Mother Nature.

These 3 natural mineral ingredients, together with Chitosan (crushed crab, prawn and lobster shells), are the ideal supplements to add to a spa or hot tub to turn an enjoyable soak into a more health providing sensation.

The efficiency dilemma

Maintaining healthy pool water for your family to swim in requires good circulation and standard pool pumps can consume around \$1000 of power every year to do so.

Standard pool using a single speed pump

Standard pool using a variable speed pump at low speed

Variable speed pumps are appealing because they present an opportunity to reduce energy costs. Whilst they can turn over a sufficient volume of water at lower pump speeds, skimming power and circulation is compromised. Without sufficient skimming and circulation, water balance is difficult to maintain, algae forms in dead spots and maintenance costs increase significantly.

This dilemma forces you to accept either high energy costs or poor circulation!

Enviraflo is the answer

Enviraflo's revolutionary approach to pool plumbing solves the efficiency dilemma by generating healthy circulation and effective skimming at low pump speeds.

Circulate water more efficiently

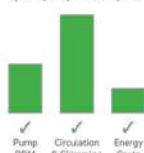

The secret to Enviraflo's energy efficiency is its patented venturi skimmer which uses just a fraction of return water to generate a skimming action equal to that created by a pump on high speed.

Circulate the water that's difficult to move

The water in the deep part of your pool is typically the most difficult to move. Enviraflo draws all suction through a drain in your pool floor to improve circulation and water quality. This process also eliminates those irritating cold water pockets lurking in the depths of your pool.

Enviraflo pool using a variable speed pump at low speed

Complete circulation

Circulation in an Enviraflo pool is superior to a standard pool because we're drawing water from the pool floor and efficiently skimming the surface at the same time. Enviraflo is the only system that maintains effective surface skimming and improves sanitation dispersal whilst a variable speed pump is operating at low speed. With Enviraflo you can have good circulation and low energy costs!

Why choose Enviraflo?

It makes sense to install an Enviraflo system into your new pool. Enviraflo is suitable for all concrete and fibreglass pools and is the only system that can combine effective surface skimming and healthy pool water with very low energy costs.

- ✓ Maintain healthy circulation
- ✓ Powerful surface skimming
- ✓ Easy pool ownership
- ✓ Energy savings for the life of your pool
- ✓ Improve sanitation dispersal
- ✓ Reduce heating and treatment costs

Enviraflo options to suit your pool

We understand all pools and ownership expectations are different, so we've developed a range of options to cater for your individual site and lifestyle requirements. Consider the options below to make sure your new Enviraflo pool is everything you want it to be.

Multiply the savings

Large pools typically require additional skimmers and even more power to maintain healthy circulation.

A large Enviraflo pool is even more efficient as additional venturi skimmers multiply your energy savings.

The invisible drain

The exclusive AVSC drain with its tile/pebble lid can be used to blend seamlessly with your pool interior, thus making it almost invisible.

Capture heavy debris

Heavy debris sites pose no problem for Enviraflo. A LeafVac debris canister can be installed to capture heavy debris, reduce maintenance and protect your pool pump.

Cleaning your pool

Enviraflo enhances any cleaning system you choose for your pool. You can even make life easier by adding pop-up cleaning heads and upgrading Enviraflo to become a self-cleaning pool.

Our Enviraflo pool saves us hundreds of dollars every year and the water quality has been immaculate throughout dust storms, heat waves, autumn falls and heavy use.

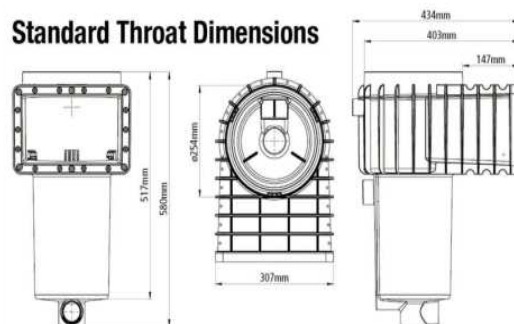

Anthony & Colleen - Proud owners of the very first Enviraflo swimming pool

FLOLUX - STAINLESS STEEL FINISHING

FloJet - 40mm Eyeball

FloJet (eyeball/return jet) is fitted with a turned 316 stainless steel spherical directional eyeball to provide efficient and manageable water flow throughout a pool, spa or water feature. The FloLock system locks the 'eyeball' within the turned stainless steel fascia and the high-grade pvc backing. This innovative engineered and design protected 'one-piece' safety mechanism ensures the 'eyeball' cannot be removed or dislodged when in situ.

Model	Product Code	List Price
FloJet 40mm Stainless Eyeball Return	FLX001	\$131.50
FloJet 40mm Stainless Eyeball Return - Threaded	FLX006	\$155.75

FloSafe - Safety Suction

FloSafe (safety suction) is Australian Standard 1926.3.2010 approved. The FloSafe is designed for safety and elegance with an incomparable finish. The polished 316 stainless steel fascia is safely secured to the high grade PVC backing with fasteners. The design for the FloSafe is both aesthetically and functionally of the highest standard

Model	Product Code	List Price
FloSafe 40mm Stainless Safety Suction	FLX002	\$244.65
FloSafe 50mm Stainless Safety Suction	FLX010	\$244.65

FloAir

FloAir (air diffuser) is a sophisticated final touch for a first class concrete spa. The turned 316 stainless steel fascia with polished smooth safe edges melds seamlessly with tiling or plaster finishes and provides a desirable finish for spas and water features. The backing is made from high grade PVC and ensures easy installation and interchangeability with existing PVC fittings.

Model	Product Code	List Price
FloAir 25mm Air Return Diffuser	FLX003	\$115.76

FloFloor

FloFloor (floor return) is turned from 316 stainless steel and is designed with a chamfered edge to direct water flow from the fitting at a 45 degree angle maximising effective water dispersion. This fitting can be used on existing floor returns, on tiles and plastered pools to replace aging, deteriorating and unsatisfactory plastic or PVC fittings.

Model	Product Code	List Price
FloFloor Infloor Return	FLX005	\$237.75

FloAir - Venturi Control

FloAir Control (air control) is designed to sit on the coping / paving header around your pool or spa with no risk of hurting playing feet. The Air Control regulates the amount of air introduced to spa jets simply by turning the top. The Air Control is turned from 316 stainless steel and the PVC backing slip fits into 25mm pipe and can be retro-fitted to replace existing PVC fittings. FloAir Control (air control) is designed to sit on the coping / paving header around your pool or spa with no risk of hurting playing feet.

Model	Product Code	List Price
FloAir Venturi Control	FLX008	\$146.75

FloSkim Facia

FloSkimmer is a fascia used to cover existing PVC skimmer box mouths to create a sophisticated fitting for the pool surface. FloSkimmer is manufactured from 316 stainless steel and is finished with a high polish. Fits AstralPool Skimmers

Model	Product Code	List Price
FloSkim Facia	FLX012	\$708.75
